

WATER DEIONIZER M18 Cod. 5G18

N° 14223-2007-AQ-ITA-SINCERT

LED bargraph conductivity meter

- M18 is a very simple deionizer to produce medium quantities of distilled water.
- 18 litres refilled cartridges, contains the ionic exchange resin. Inox made vessels.
- This system can works with usually two 18 litres cartridges. It is possible add more than two cartridges to produce large quantities of deionized water.
- Battery powered conductivity meter to display, on a LED bar graph, the conductivity of the out water. Manufactured in according with CE rules.
- Input water pressure reducer with manometer and double prefilter system.
- Fast type pipes, for an easy substitution of the cartridges.
- With two cartridges and an entry water of medium hardness, it is possible to produce about 1500 litres of deionized water.
